

AWNMAX FEATURES

SUPERIOR TRANSLUCENCE

Not just brighter but better quality illumination. Awnmax lights brighter, more vibrantly, more evenly and with less hot or cold spots than any other backlit. The difference is especially noticeable on dark colors where Awnmax is 2x to 5x as translucent. Awnmax translucent quality can translate into electrical savings with less lamping required in some applications. No other backlit comes close to Awnmax's illumination quality! (See graph)

SUPERIOR STRENGTH

Ounce for ounce Awnmax is the strongest awning fabric on the market. As a fabricator you'll appreciate this when tensioning, your end user will appreciate the superior resistance to tearing and blowout. (See strength graph)

PROVEN DURABILITY AND ANTI-FADE PERFORMANCE

Awnmax has proven 10+ year durability in markets across North America, from Texas and Florida to Alaska. When uv durability and performance counts Awnmax is the first choice of established awning manufacturers.

SUPERIOR DYE LOT CONSISTENCY

The color consistency and quality of Awnmax are unsurpassed. The very best pigments known to man are used. You never have to worry about dye lots with Awnmax.

LESS SEAMS

AWNMAX's 80" width is perfect for large awnings. In many applications it can mean the elimination of seams and the ability to railroad fabric across long lengths of awning. This translates into savings in material and labor as well as cleaner finished appearance to the awning.

GREAT GRAPHIC ADHESION

Awnmax has a specially designed acrylic topcoat designed to accept 3M Scotchcal 3630 translucent film Series.

ANTI-WICKING SCRIM

Awnmax's scrim is anti-wick treated to prevent contaminants from being absorbed into the laminate causing permanent discoloration.

HEAVIER YET MORE SUPPLE

At 19.1 ounces/square yard Awnmax is 20% heavier than most competitive awning materials. Yet Awnmax offers superior handling characteristics in manufacturing, is resistant to crazing, tensions easily and is more forgiving.

STAPLE STITCH COMPATIBLE

Awnmax's woven scrim and heavy construction make it an ideal material for staple bar construction and offers superior blowout protection.

20 VIBRANT COLORS

Awnmax's low luster appearance give Awnmax's 20 vibrant colors a high quality and rich appearance that is unmatched by any commercial awning material.

LOW MAINTENANCE

The smooth surface and acrylic topcoat of Awnmax keep Awnmax cleaner for longer, easier to clean when required. The topcoat acts as a non-porous coating shedding most dirt and pollutants.

FIRE TESTS

Awnmax conforms to the most stringent flammability requirements in North America including UL214, ULC-S109M, NFPA-701, CSFM, ASTM E-84 and ASTM D-568

RESISTS BRUISING AND MARKING

The unique construction of Awnmax makes it one of the most durable and workable of awning fabrics

No other awning material has all of these quality features. All of the above features are inherent components of Awnmax, not just applied to the surface.
