

# AWN SHADE FEATURES

Originally designed as a front-lit, this versatile awning material is gaining rapid use in backlit applications as well due to its inherent translucent quality. No other awning material in its class boasts so many qualities. Awncolor's affordable quality makes it suitable to a variety of applications where long term value and durability are required.

## **GREAT GRAPHIC ADHESION**

Many awnings incorporate corporate logos and identification. In most cases decoration is achieved by applying adhesive vinyl lettering. Awncolor has a specially designed acrylic topcoat that provides it with outstanding, virtually unmatched graphic adhesion.

## **SUPERIOR STRENGTH**

Ounce for ounce Awncolor is the strongest awning fabric in its class whether you are comparing to front-lit or back-lit offerings.

## **BACK-LIT OR FRONT-LIT**

Awncolor is inherently translucent and ideal for back-lit applications as well as front-lit.

## **PROVEN DURABILITY**

Awncolor has been engineered applying many of the proven formulas used in its bigger brother Awncolormax, a product with over 15 years proven history in North America. Manufactured by Hiraoka, a company that has been a leader in supplying fabrics to the world's harshest environments for nearly 30 years. You can be confident that Awncolor will stand the test of time, sun, wind, rain and whatever else mother nature offers.

## **COLORED BOTH SIDES**

Awncolor is colored on both sides making it ideal for a variety of applications including residential fixed and retractable awnings, privacy curtains, long term banners, industrial covers, just to mention a few applications.

## **SUPERIOR DYE LOT CONSISTENCY**

The color consistency and quality of Awncolor are matched only by its predecessor Awncolormax. The very best pigments known to man are used. You never have to worry about dye lots with Awncolor. From roll to roll or shipment to shipment Awncolor delivers a perfect match.

## **ANTI-WICKING SCRIM**

Awncolor's scrim is anti-wick treated to prevent contaminants from being absorbed into the laminate through capillary action causing permanent discoloration.

## **STAPLE BAR COMPATIBLE**

Awncolor's construction make it an ideal material for staple bar construction. Supply, even tensioning, strong.

## **20 VIBRANT COLORS**

Awncolor's low luster appearance give its 20 vibrant colors a high quality and rich appearance, year after year.

## **LOW MAINTENANCE**

The smooth surface and acrylic topcoat of Awncolor keep Awncolor looking new for longer, easier to clean when required. The topcoat acts as a non-porous coating shedding most dirt and pollutants.

## **FIRE TESTS**

Awncolor has excellent f/r qualities and conforms to ULC-S109M, NFPA-701 and CSFM

## **RESISTS BRUISING AND MARKING**

The unique construction of Awncolormax makes it one of the most durable and workable of awning fabrics

## **WELDS BEAUTIFULLY**

Few awning materials with protective topcoats weld as nicely as Awncolor. You'll love how it welds.
